Some passengers on a KLM flight got a bit worried when they discovered a real-life skeleton in their seat. Just in time for Halloween, a fake skeleton was discovered aboard a KLM flight. Fortunately, no one was injured and the plane landed without further incident. Flight EK6091 to Amsterdam, Neth. from Arusha, Tanzania landed safely after the skeleton was discovered by passengers when they removed their seat-belts and looked around. Not a real skeleton, but a real act. Crew of Flight EK6091 landed safely. [pic.twitter.com/jXdX4xD2iV](https://pic.twitter.com/jXdX4xD2iV) — Dutch Safety Board (@dsbweb) October 31, 2019 CKM/UNOVISION @tink\_jansen is a guest of @KLM @DutchSafetyBoard KLM-EK6091 EK Amsterdam - Arusha arrived safe and sound. Thanks for the story and the photo, @dutch\_safetyboard [pic.twitter.com/cMBtEBVKEt](https://pic.twitter.com/cMBtEBVKEt) — CKM/UNOVISION (@ckmnews) October 31, 2019 The plane was reportedly on the flight from Moshi, Tanzania, to Amsterdam, Netherlands. The Dutch Safety Board tweeted a picture of the skeleton and wrote that it was "simply a seat". The skeleton was in the "hand luggage" compartment, according to a passenger quoted by Dutch newspaper Algemeen Dagblad. The Dutch Safety Board tweeted it had informed KLM, which confirmed that the flight landed safely. Also on rt.com 'Dumb show': French woman accuses fellow

### ChProxy Free

KEYMACRO is a tool to help you customize keystrokes. With KeyMACRO you can define what keystrokes are available on your keyboard and when they are available. You can assign keystrokes to task on any desired device. You can then use macros to perform these tasks as many times as you need. KeyMACRO is a great tool for day to day activities and for professional use in the office. KeyMACRO is useful in any setting where you need to automate repetitive tasks. You can use KeyMACRO to define a complex sequence of tasks or a single task to be performed on many different devices. You can define a macro to be repeated each time you log into a certain device or at a specific time every day. KEYMACRO Features: [?](#) Built-in Keystroke Manager: You can assign keystrokes to any task on any device. You can assign keystrokes as many times as you need. [?](#) Hotkeys: You can define hotkeys to automate tasks that are already defined in the Keystrokes Manager. You can define hotkeys to minimize the use of the keyboard and to perform tasks easily. [?](#) Scripts: You can assign scripts that perform a sequence of tasks to be performed at a certain time each day. [?](#) Configure to many devices: You can easily add many devices to your keystrokes manager and they will all be updated at the same time. [?](#) Add custom keystrokes: You can add a custom keystroke to perform a task, even if the macro has already been created. [?](#) Customize the keystrokes manager: You can access the settings of your Keystrokes Manager in the Preferences window. KEYMACRO Installation: Windows Version: Click on the shortcut you have created to the location of the install file you downloaded to your desktop. Right click on the file and select "run as administrator" and wait for the install to finish. macOS Version: Click on the shortcut you have created to the location of the install file you downloaded to your desktop. Open the Finder, and click on the shortcut, then click on the menu that appears and select "open". Wait for the install to finish. KEYMACRO Support and Documentation: KeyMACRO developer support: When you install KeyMACRO it should automatically open the KeyMACRO developer page to help you with any issues. If this doesn't happen you can open the 1d6a3396d6
